

Africa Health and Wellbeing Initiative Seminar

Toward Solving Health Challenges in Africa

Date
&
Time

March 2nd (Thu), 2023
UTC 9:00 – (JST18:00 –)

March 3rd (Fri), 2023
UTC 9:00 – (JST18:00 –)

Online Event

Proceedings will be conducted in English
(Simultaneous interpretation in Japanese, English
and French)

Under the Africa Health and Wellbeing Initiative (AfHWIN), Japanese government has been working together with African countries to address health issues. As part of these initiatives, in this seminar, we will ask Japanese companies to introduce the solutions for solving issues related to maternal and child health, water, hygiene, and nutrition, which form the basis of healthcare. We hope that this seminar will be an opportunity for us to deepen mutual understanding and networks by discussing the expectations and proposals toward Japan, and it would be grateful if you could strengthen the collaboration with stakeholder for the future.

Yamaha Motor Co., Ltd.

Yamaha Motor has been engaging in development, production, and sales activities through 140 group companies in 30 countries and regions based on as following multiple pillars; a land mobility business that includes motorcycles, four-wheel buggies, and electric-assisted bicycles; a marine business that includes boats and outboard motors; and a robotics business that includes surface mounter and drones. Through these activities, we are tackling to realize “Kando* Creating Company” as our corporate mission. Development of a water purification system for villages started in the 2000s, and this kind of marketing was started in 2010. We have installed 48 machines mainly in Africa and Asia.

*Kando is a Japanese word for the simultaneous feelings of deep satisfaction and intense excitement that we experience when we encounter something of exceptional value.

Mitsubishi Chemical Aqua Solutions Co., Ltd.

Mitsubishi Chemical Aqua Solutions has been providing hygienic drinking water from a variety of water sources such as groundwater and river water by utilizing various water treatment technologies. In addition, we have some specified technologies to manufacture advanced medical water such as purified water for dialysis, and those also will contribute to BCP measures for hospitals as a countermeasure against water outage in the event of a disaster. In recent years, we have been also actively promoting initiatives for environmentally friendly solutions such as safe water supply in Kenya and Tanzania, and our collaboration with UNDP and JICA has been highly evaluated.

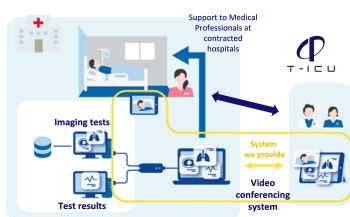

Yukashikado Incorporated.

With the MISSION of “Yukashikado will dedicate ourselves to the creation of equal environments and opportunities in the world, and create a world where people with the ability to make efforts can become stronger.” Our company is a start-up aiming to create an environment can properly understand and intake the nutrients that support their lives.

We are developing a nutrition improvement business that provides one-stop service between testing to evaluate nutritional status coming from urine data and supply of personalized foods based on the testing results.

T-ICU Co., Ltd.

With the MISSION of “To provide the best medical care for people around the world”, T-ICU is committed to deliver necessary medical care to patients on site using remote technology based on high quality and expertise.

Outline of main business services as follows;

1. Provision of consultation services and systems related to remote intensive care and emergency
2. Staff training on intensive care and emergency (education)
3. Hospital consultation (medical safety, etc.)

Hakuzo Medical Corporation

Hakuzo Medical has been making efforts to supply safe and secure products of medical sanitary materials to medical treatments and nursing care facilities for 70 years. Currently, we are exporting our products to ASEAN countries, East-Asian countries, Australia, USA, the Middle East, and African countries. We surely believe the reason why earns the trust and continuous use of our products for medical treatments and nursing care facilities is to establish the product feedback system in place that allows us to respond to the “wishes” of our customers by the collaboration among sales, development, and production activities. We hope to collaborate with health care professionals for the future along with getting “wishes” and “needs” of each Africa countries through this seminar.
